

PatchWise A2A_CLI

Autonomous Builder-Reviewer loop for Linux patch review, lore intake, findings gating, and respin generation.

Roles: Chanakya + Aryabhatta

Mode: Local / Resume / Lore

Outputs: Findings + HTML + Respin

Problem

Manual patch babysitting is slow and inconsistent. A2A automates round-by-round review while preserving evidence and human auditability.

Agents

- **Chanakya (Builder):** Applies fixes, references exact lines, reports residual risks.
- **Aryabhatta (Reviewer):** Adversarial validation, concrete findings, no unsupported LGTM.
- **Orchestrator:** Session lifecycle, findings tracking, policy enforcement.

Hard Gates

- LGTM blocked when open findings exist.
- Reviewer self-consistency guard blocks contradictory LGTM.
- Optional: checkpatch/static-analysis gates.
- Worktree lock avoids concurrent corruption.

How To Run

```
a2a loop --task <name> --watch-path /abs/path --max-rounds 3
```

```
a2a loop --task <name> --lore-url "https://lore.kernel.org/all/<msgid>/"
```

```
a2a loop --session <session-id>
```

```
./run.sh <lore-url|msgid|session|path>
```

Pipeline

Input Local patch, lore URL/msgid, or session resume

→

Session Init Create/update session metadata and round context

→

Builder Round Fix patch, emit evidence + residual risks

Validation Gate Schema + checkpatch/static checks

→

Reviewer RoundRaise/close findings with location + action

→

LGTM GateBlock on open/new/inconsistent findings

PassLGTM + session report + optional auto-respin vN+1

↔

FailInject prior findings/comments and continue next round

→

StopMax rounds or operator decision

Artifacts

- .a2a/sessions/<sid>.json

- .a2a/logs/<sid>/

- .a2a/reports/<sid>/round-XX-*. {md,json}

- .a2a/reports/<sid>/session-report.html

- .a2a/patches/<sid>/vN/ (respin output)

Capabilities Snapshot

- Patch/lore review loops with resume and round extension.

- Prior-thread comment ingestion and actionable mapping.

- Auto-respin generation and patchset coherence checks.

- Email bridge optional mode for remote operations.

- Terminal + HTML reporting with round metrics.
